

## T-SHIRT IRON-ON INSTRUCTIONS

**Make a gift! Print the t-shirt iron on for the holidays!**

**Please read the instructions included with your iron-on transfer paper. If there are no instructions, please use the ones below.**

1. First, ask a grown-up to help. You should never handle a hot iron without a grown-up's supervision.
2. Print the image on page 2 onto iron-on transfer paper.
3. Have a grown-up preheat the iron for 8 minutes on the highest setting with NO steam.
4. Carefully trim the image leaving one-quarter inch white space around your design on all four sides.
5. Position the trimmed transfer sheet onto the fabric with the image side down. Make sure it's exactly where you want it!
6. Have a grown-up iron the design onto the shirt. Firm pressure must be applied while passing over all of the edges and corners.
7. Allow the transfer to cool completely (about 60 seconds) before removing the paper backing.
8. Use your fingernail to gently lift one corner of the paper backing and peel off the paper carefully.
