

Instructions:
1. Print out the decals on inkjet T-shirt transfer paper (available at most craft stores) for white or light fabric blends.

*Most printers will automatically mirror the image when you select T-shirt transfer paper from the drop-down menu while adjusting print settings. If your printer does not have this feature, download the already mirrored-image version of the decals.

2. Cut out the decals and iron them on to the shirt by following the instructions provided with the T-shirt transfer paper. You can add additional details to your T-shirt with fabric paint. Be sure to cut out instructions before applying your Hothead iron-on.
