

## About Page & Turnbull

Page & Turnbull was established in 1973 as Charles Hall Page & Associates to provide architectural and conservation services for historic buildings, resources and civic areas. The firm was the first architectural practice in the San Francisco Bay area to specialize in historic preservation and is one of the longest-practicing such specialty firms in the country.

Page & Turnbull serves government, institutional and private sector clients from its offices in San Francisco, Los Angeles and Sacramento. Holding more than 100 awards for its work, the firm works to advance the quality of historic preservation design, conservation and research. In addition to The Walt Disney Family Museum, Page & Turnbull is also the architect for two other projects in the Presidio of San Francisco: the Presidio Chapel and Wyman Avenue residences. Other notable projects include the rehabilitation of the Ferry Building in San Francisco, Badger Pass Ski Lodge in Yosemite National Park, and several buildings at Stanford University.

With a staff of licensed architects, architectural designers, architectural historians, conservators, and planners, Page & Turnbull is committed to conserving significant buildings and places, allowing these resources to function for present and future needs. Accordingly, all of the firm's professional staff meet or exceed the Secretary of the Interior's *Historic Preservation Professional Qualification Standards*.

## Jay Turnbull, FAIA

Founding Principal

Jay Turnbull was educated at Princeton and began work in New York as an architect and urban designer. He came to San Francisco in 1971 and later served as the staff architect of the Foundation for San Francisco's Architectural Heritage from 1974-1979. In 1981, continuing his focus on historic preservation, Jay formed a partnership with Charles Page, and helped to build Page & Turnbull into a nationally renowned practice. Jay's work on the rehabilitation or restoration of significant landmarks in the American west has been recognized with numerous awards and publications. He is a fellow of the American Institute of Architects, past president of San Francisco Architectural Heritage, and chairman emeritus of the Maybeck Foundation.

About Page & Turnbull—continued

**CAROLYN KIERNAT, AIA**

Principal

Carolyn Kiernat is co-manager for design of The Walt Disney Family Museum. She has served as both prime architect and preservation consultant on projects ranging from small-scale historic residences to major commercial adaptive re-use developments, drawing upon her expertise in applying the Secretary of the Interior’s *Standards* to the federal tax certification process. She holds a master of science in historic preservation from Columbia University and has completed research and documentation projects at Sequoia, Joshua Tree and Mesa Verde National Parks. Her current projects include the rehabilitation and adaptive reuse of the Old Mint and the Exploratorium’s new home at Piers 15/17, both in San Francisco.

**LADA KOCHEROVSKY, ASSOCIATE AIA**

Associate Principal

As a designer and a project manager, Lada Kocherovsky has led the design of a wide range of rehabilitation projects and studies, including the Antelope Valley Indian Museum Environmental Stabilization for the California Department of Parks and Recreation, the University House at the University of California at Berkeley, and the historic Hotel Montgomery in downtown San Jose, California. Lada holds a bachelor of science in architecture from Samara State Academy of Architecture and Engineering, Samara, Russia. She currently is serving as a co-manager for of The Walt Disney Family Museum.
