

## BLENDING LEARNING SERIES

The Blended Learning Series combines traditional classroom education with out-of-class learning opportunities encouraging participants to fully experience all aspects of The Walt Disney Company as a learning laboratory. Participants will engage in group and individual learning activities designed to expand their knowledge and understanding of a variety of topics, as well as develop an expanded understanding of their personal learning styles and preferences.

Through self discovery and integrated learning opportunities, participants will develop a greater understanding of The Walt Disney Company by exploring such topics as creativity & innovation, leadership, history and heritage, and globalization. In addition, participants will experience a broader perspective on a variety of topics that may include diversity, leadership, and community responsibility.

### Learning Objectives

- Identify knowledge, skills, and behavior needed by leaders to achieve success in The Walt Disney Company.
- Recognize the importance of innovation, technology, and global business to the success of The Walt Disney Company.
- Integrate experiential learning, academic material, and work-related experiences to their course learning assignments.
- Explore the value of diversity on a personal and professional level.
- Engage in specific Guest experiences to identify the value of and relationship between education and entertainment.
