

# Activity Guide Objectives

1. Enrich students' viewing of the new Disney nature film **earth**.
2. Prompt student inquiry about the three animal families featured in **earth**.
3. Guide student exploration and understanding of the animal families' changing habitats in **earth**.

## Activity Guide Standards Alignment

### Activity **National Science Education Standards for Grades 3 – 5**

#### Activity 1: Three Animal Families

- Characteristics of organisms
- Organisms and environment

#### Activity 2: Adapting to Habitats

- Organisms and environment
- Populations and ecosystems
- Diversity and adaptations of organisms

#### Activity 3: Coping with Change

- Interdependence of organisms
- Organisms and environment
- Populations and ecosystems
- Diversity and adaptations of organisms

#### Activity 4: Check Your Family's **earth** IQ

- This take-home activity includes questions relating to all standards addressed in the three classroom activities.
