

# How to Do a Wireless Trade for the *Enchanted* Nintendo DS™ Game

- ❖ First find another Giselle Gamer who has the *Enchanted* Nintendo DS™ game and Nintendo DS™ system so that you can do a wireless trade with her. For the trade to work you must do this in person/be in the same room.
- ❖ In order to do a trade, you and your friend must have played the game to a save point where you have both collected items and saved them in your game's inventory.
- ❖ Go to the main menu and select the "Wireless" option and press the **A Button**.
- ❖ On the next screen, select "Host" and have your friend select "Guest" and press the **A Button**. "A connection has been made!" will pop up, once you have made the connection.
- ❖ Next you'll see the inventories of collectibles for your game and your friend's. Search your friend's inventory and select up to 9 items you want. She will do the same on her DS system.
- ❖ Select "Ok" with your Stylus at the bottom of the screen. Press the **A Button** and a message will come up, "Ok to exchange these items?" Select "Yes" by pressing the **A Button** and your items will be exchanged.
- ❖ After a successful trade, you will return to your inventory. If you want to trade more items, follow the steps above. If you are done trading, press the **B Button** to return to your game.
