

GETTING READY TO IRON

1. Cut around the edges of your design, leaving a 1/4" white border all the way around.
2. Place the clothing item you wish to transfer the design to on a smooth, hard, nonporous surface.

*** Hint: Do not use glass or a padded ironing board.**

3. Set the iron on the highest dry setting and heat the iron for 8 minutes before beginning -- do not use steam.
4. Place a smooth towel or pillowcase on the ironing surface for padding -- be sure there are no wrinkles in it and the surface is completely smooth.
5. Next, place the clothing item on top of the pillowcase. Iron the clothing item where the transfer will be applied.

*** Note: Avoid placing the transfer on seams.**

6. Let the surface of the item cool before placing the transfer on top, image-side down and, the white-side up.

Additional Notes:

For best results carefully follow the instructions included with the Iron On transfer paper.
