Your universe is growing, Pisces. It's a time of incredible, life-altering creativity for you. Go inside yourself to create a personal fashion trend full of color and texture that'll have the other gals trembling with envy!

ARIES March 21-April 19

It's a time of radical change for you, girl! Even if you wish it could be slow and easy, a series of eclipses in your sign will wake you up and shake you loose. Go for a bold new look -- black lace on denim, shawls, and wild patterns. Even if change scares you, embrace it for a new you.

TAURUS April 20-May20

As a fixed sign, Taurus is a gal who offers stability and order. But how does that influence your fashion sense? While you may need to stay in the same shapes and patterns you favor right now, make a bold choice with bright, strong colors -- purples, reds, black, and strong green to break out of your stable mold.

GEMINI May 21--June 20

Girlfriend, you have had some fashion setbacks in the past, but right now, your Gemini fashion double vision is going to set you on an exciting new course. Think double ...where a soft and sweet look in linen and lace may be nice, don't overlook fashion choices in passionate reds and purples, silks and taffetas. You can't miss!

CANCER June 21--July 22

For Cancer girls, life has been rather too spare and Spartan in the good looks department. Time to change that in a big way! You're ready for a new depth in your look, so study the classics. Beautiful fabrics like velvets and silks will do you good -- and take a look at classic film stars for great ideas you can work with.

LEO July 23--August 22

Leo the lioness ... you are prepped for great things, getting set to make a bold new impression as you overcome setbacks from the past. But you'll have to call on the lazy lion inside and go slow. Don't remake your look hastily. Take time and study new trends in hair and makeup for a look you can really call your own.

VIRGO August 23--September 22

Hardworking, sincere Virgo, you're more apt to help a gal pal with a makeover than treat yourself to one. Well, you may have to transform yourself slowly, but now is a definite time for risktaking and breathing new life into your personal fashion statement.

LIBRA September 23--October 22

Perhaps you've been subdued of late under the weight of hard work and responsibilities, dear Libra girl. But you are about to hit the runway of life with an extra dose of razzle dazzle. Don't be afraid to go boldly into a daring new look full of strong color and geometric shapes. Bold is right for you right now!

Try to put aside money concerns and focus on what works for you. You'll find a way to create a look that can work and stay within a budget.

CAPRICORN December 22--January 19

Fun, laughter, and romance are on your fashion agenda right now, Miss Capricorn, especially after the dark and dire phase you've been through recently. So keep your fashion radar alerted to trends that highlight a romantic and fun-loving you, including swinging skirts in cotton and lace and brightly colored solid dresses that can be accessorized for lots of fun and variation.
