SUMMER-SCOPE

Capricorn: December 22 – January 19

Dear Capricorn: You don't need to spend much to update your wardrobe. You always have the essential pieces to mix and match, so just get a couple of colorful new tanks or a fun hat. Let that certain someone know you're interested. Results will be spectacular. Plan a date for some summer fun because it's coming!

Aquarius: January 20 – February 18

Dear Aquarius: Get that cute new cut you've been admiring on your favorite celebrity. Write your favorite story in your new notebook and definitely get your pet a new toy or new bed – they'll love you for it! You can look forward to an adventurous summer with a new friend as well as getting your one special wish fulfilled. Enjoy!

Pisces: February 19 – March 20

Dear Pisces: You're always updating your wardrobe and you love the latest styles, but why not create your own style this summer? You're very creative, so let your ideas flourish! And if you're looking for that special someone, the future is bright. Let them come to you – after all, you are the princess of the zodiac!

Aries: March 21 – April 19

Dear Aries: Let your originality shine through by rearranging your room. Use ideas you've been saving up for rainy days to spill sunlight into your living space. Frame your poems and hang them on the wall or make fun collages that showcase your individuality. Be bold and call an old friend. He or she may be awaiting your call!

Taurus: April 20 – May 20

Dear Taurus: We all know that you like to sing, dance, wear loud colors, and be the center of attention, and this summer is no different! Be sure to invest in floral print capris, colorful tanks, and flip-flops that show off your decorated toenails. Focus on new ways to make summer money and get over the old news in the heart department!

Gemini: May 21 – June 21

Dear Gemini: The twins in you are constantly battling between red and green, purple or pink. You can honor both personalities by taking turns! One day wear pastels and flowers in your hair, the next day, wear funky, punky clothes with pigtails. You are the ever-changing personality of the zodiac. Your latest pen pal will be very chatty with you. Make a date -- you won't be disappointed!

Cancer: June 22 – July 22

Dear Cancer: Been spending a little too much time alone in your room lately? Break out of your rut by throwing a pedicure party and have all your friends bring a nail color to share. Make trail mix snacks and bake your favorite cookies. You and your friends can catch up on this special day and share summer break stories while making your feet summer ready. Before long it will be back to school. Hey, who's the new hottie in your class?

Leo: July 23 – August 22

Dear Leo: What can we say for the sun queen? While you are always in style and in the spotlight, you could still use a little sprucing up! Let that mane of yours get some summer highlights and add some new espadrilles to your collection in the overcrowded space you call a closet. Hold on to your heart, your summer crush could be moving in next door!

Virgo: August 23 – September 22

Dear Virgo: This summer is all about organizing your closet and getting rid of your old clothes to make room for the new. Donate your latest casualties and let your parents get a tax deduction. Maybe they'll increase your allowance! You can find lots of summer deals on new duds and be glad that you did. You never know who you'll run into at the mall. It may be someone you forgot about!

Libra: September 23 – October 22

Dear Libra: This is your time to reinvent yourself. You are creative, fun, and love the art of balance. Continue that trend by incorporating new makeup ideas into your summer style. Hairpieces or flowered barrettes are really fun to work with. Sparkles are here to stay! Try out your new look at the next neighborhood party.

Scorpio: October 23 – November 21

Dear Scorpio: Let your fingers do the walking. Research that favorite purse you've been dying to have but haven't been able to afford. Summer sales are going to make it possible for you to get that fabulous accessory. Finance your love of clothes with some babysitting money or dare I say, by mowing the neighbor's lawn? You have a knack for getting what you want, so whatever it takes you'll be riding into summer with definite style. Admirers will be fawning over you.

Sagittarius: November 22 – December 21

Dear Sagittarius: You are very outspoken and everyone knows your style, but why not drop your sneakers for some pumps? Don't worry about not being able to maneuver in the new shoes. You're in such great shape you'll be able to balance however high the heel is! Read up on your favorite celebrity and try to make a similar style update. Who knew you liked hair, makeup, and clothes so much? Last but not least, your summer wish will come true when you least expect it!
