

The Cold War Episodes and People

STUDENT ACTIVITY

DIRECTIONS

Complete an episode pattern organizer such as the one below for each of your group's assigned events. For the "effect" you should first predict what you believe should happen, based on the characteristics of the episode and the people involved. Afterward, compare that to the actual historical outcome of those decisions, and respond to Part II. You may use the Internet, library resources, etc. where necessary should you or your group members decide you need more information than you have available.

Part I

Part II

Describe the accuracy and inaccuracy of your group's predicted effect. Why do think this happened?
