

Vidia's Wind Wheel

Wind wheels are a fun way to watch the wind blow! Follow Vidia's simple instructions to make your very own wind wheel! It's a BREEZE!

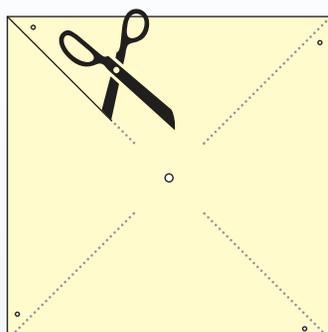

ALL YOU NEED IS: paper | safety scissors | ruler | pencil | pin or tack | stick | pliers

INSTRUCTIONS: *Have an adult help you when using scissors, pins or any sharp metal objects.*

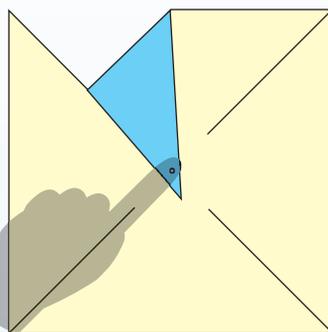

~ step 1 ~

Use your ruler and pencil to draw a template—like the one above—on a square piece of paper

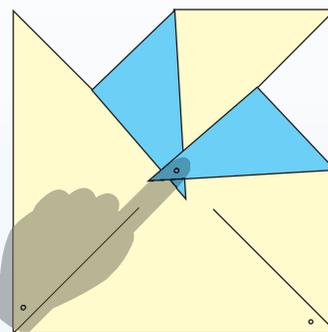

~ step 2 ~

Use your safety scissors to carefully cut along the lines from the corners toward the center

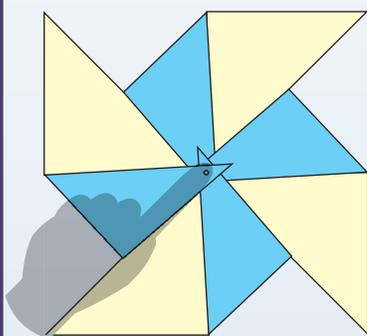

~ step 4 ~

Gently curl one of your dotted corners over, matching up the corner dot to the center dot

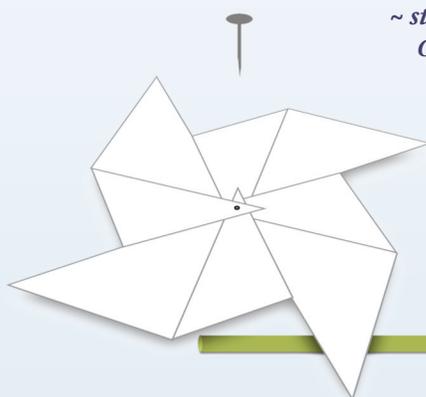

~ steps 5,6 ~

Repeat step 4 on each corner while holding the tips in place in the center with your fingertip

~ step 7 ~

ASSEMBLY: *Have your stick ready on a flat surface*

~ step 8 ~

Carefully insert your pin through each corner dot. Once your pin is through each corner – carefully insert it through the dot in the center of the paper.

~ step 9 ~

Holding your wind wheel together around your pin – press the tip of the pin firmly into your stick.

~ step 10 ~

Ask an adult to crimp down the pointy tip of the pin – coming out of the back of the stick – with pliers.

Get Creative

Have fun exploring the different papers, sticks and decorations you can use. Use your imagination to make your wind wheel look the way you want it to!
