

# Dr. Facilier's Diabolical Dots & Boxes

Not even voodoo magic can help you win this one. Keep your wits about you!

## How to Play

1. Print the game boards; players will need a pen or pencil.
2. Take turns drawing straight horizontal or vertical lines to connect any two adjacent dots.
3. If your line completes a full four-sided square, write your initial in the box and take another turn. If your line does not create a box, it's the next player's turn.
4. Keep playing until you can't make any more lines ... then count the amount for each player. The player with the most boxes wins the game!
